The **Gulf of Mexico Coastal Ocean Observing System** is opening a call for proposals as part of its five-year work plan under the U.S. Integrated Ocean Observing System (IOOS) FY 2021 Notice of Federal Opportunity.

Proposals to GCOOS should support sustained ocean observing in the GOM and fit within the GCOOS Strategic Plan 2020-2025. During the webinar, Dr. Kirkpatrick will discuss the GCOOS system priorities for the next five years.
